Top Coming Two Year Old Angus Bulls

Dear Cattlemen:

**From A Time
Proven Cow Herd**

Take this opportunity to own a Two-Year-Old Angus bull from an established and reputable herd. With 90 years of breeding continuous cow families, combined with three generations of Angus knowledge, you can buy with confidence.

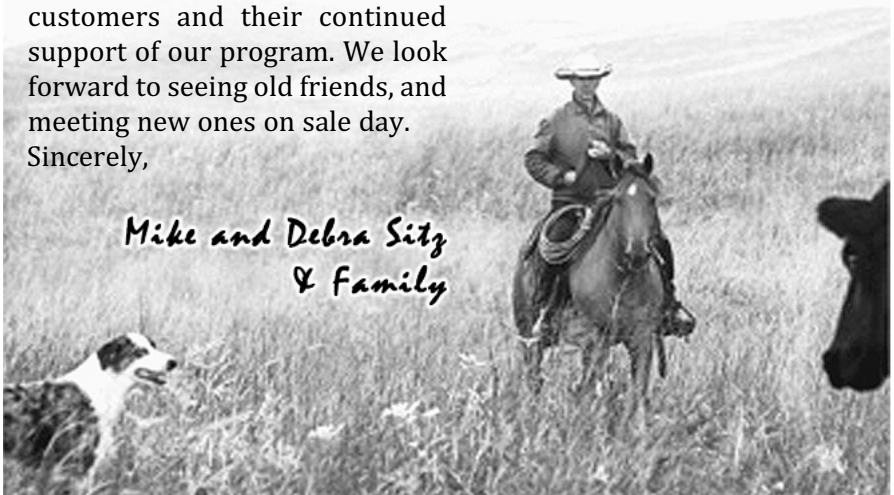

The cowherd is time proven with bloodlines tracing back to the original cow families first owned by grandfather Will Sitz, in 1923. Efficient cow lines have emerged by staying on track, avoiding fads, and being committed to raising fault-free cattle.

When you purchase a bull from us, you are purchasing a program with profitable traits that you cannot find sifting through the numbers. There are no epds to measure the most important economic traits such as fertility, mothering ability, and calf survivability. This bottom line of profitability is something we take seriously.

Selling from these hard working cows is the very top of our 2013 bull crop. All are virgin bulls with the exception of those we used within our own herd. The bulls were summered on grass without supplemental feed until the end of October. At the present time they are being fed a high roughage ration in a large pasture with plenty of room to run.

We are grateful for our loyal customers and their continued support of our program. We look forward to seeing old friends, and meeting new ones on sale day.
Sincerely,

*Mike and Debra Sitz
& Family*

— **MSAR Right Time 7757** —

— **MSAR Wilfred 0041** —

MSAR Right Time 7757's sire, 24J, is known as the Cow Maker. Right Time 7757's daughters are following this tradition, being moderate framed, sharp and feminine, with excellent udders.

His three-generation pedigree is packed with ten Pathfinders, including his dam, 1029, who has a BR of 9/95, WR of 9/106 and a YR of 9/106.

By observing his daughters as they mature, we find we appreciate this bull even more for the positive impact he is making in our cowherd.

— CAR Chinook 786 —

— MSAR Chinook 9569 —

CAR Chinook 786 has a strong pedigree and generations of maternal excellence. As an outside AI sire, he is one of the most consistent bulls at weaning we have used in a long time. He stamps each calf with good disposition; eye appeal and thickness from start to finish. Chinook is a proven calving ease sire, with an attractive style all his own.

We are very pleased with Chinook's daughters in production. Their sons selling in our annual bull sale are the stand out ones, and as people view our heifers, the Chinook daughters are the first ones they ask about. It is rare to find a maternal bull that sires both such eye appealing daughters and sons.

MSAR Chinook 9569 is a calving ease bull, and a son of CAR Chinook 786. Chinook 9569 has strong performance on both his sire and his dam's side going back several generations. The maternal grandsire, Sitz Traveler 6802, is a noted female producer. The dam and grand dam of Chinook 9569 are consistently high producing cows, having seven, and nine calves on record. The great-grand dam, 890, is an N Bar Emulation EXT daughter. She was a high producing, good uddered female as a fifteen year old, with a total of 14 calves on record. Her daughters are following this same pattern of consistent production.

MSAR Chinook is very stylish and slightly larger framed than our Forte and Right Time sires. Chinook is eye appealing with a good disposition. We are pleased with the daughters in production.

* Lots 33, 51 and 58 were used as cleanup on heifers.

* Lots 3, 28, 42 and 67 were used as cleanup on cows.

**Wean Ratios compare two Contemporary Groups:
Heifer's calves and cow's calves.**

Yearling Ratios have been compared in one Contemporary Group.

Note: The ratios of the bulls raised in the herd of Joel and Bethany (Sitz) Johnston, JJA, are compared within their own herd.

Calving Ease Direct (CED) is an EPD expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when the sire is bred to first calf heifers.

Calving Ease Maternal (CEM) is an EPD expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughter will calve as first-calf heifers when compared to daughters of other sires.

First Breeding Season Coverage

All bulls selling for \$3000 or more will be covered 50% by Mike Sitz Angus if they are injured during their first breeding season. First breeding season is defined as the 60-day period following the first turnout of the bull on injuries that occur in the breeding pasture. 50% of the value of the injured bull, minus one-half salvage value, will be given as a credit in a future sale or toward a replacement bull if one is available. As a two-year-old bull, the minimum salvage value will be valued at \$1750. Salvage value will be split equally between Mike Sitz Angus and the buyer. A veterinarian must diagnose all injured bulls. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2015. This is not mortality insurance. This does not cover poor management or neglect.
