TOP COMING TWO-YEAR-OLD ANGUS BULLS

MODERATE FRAMED BULLS FROM A TIME PROVEN COWHERD.

Dear Cattlemen and Friends:

We are pleased to announce that we will be adding three new members to our ranch team. Being young, ambitious, and very capable, our daughter, Bethany, her husband Joel, and their daughter, Jordee, (JJA) will join our ranch operation this winter. JJA have been marketing bulls with us for the past seven years. The beginning of their purebred business began in 2007 with the trade of one good ranch horse for three registered cows. The horse is still sound, and the JJA herd has multiplied as more cows have been purchased from the MSAR herd. We feel blessed as the 100th Anniversary of the Sitz Angus herd nears, that the herd will continue in such capable hands.

Maternal genetics have been at the heart of the MSAR breeding program for generations, and we are offering sound, functional, eye appealing bulls from our proven cow families. You will find a consistency that can only be found from generations of selective breeding.

Selling is the very top of our 2017 bull crop. All are virgin bulls with the exception of those we used within our own herd, and those Trich tested negative.

After weaning, the bulls are put on a ration to gain two pounds per day. As yearlings they were summered on grass without supplemental feed until the first part of November. At the present time they are being fed a high roughage ration with plenty of room to exercise.

For moderate framed Angus bulls that will produce functional and efficient females with **Fertility, Survivability and Profitability**, look to Mike Sitz and JJA Angus Bulls.

Please feel free to call with any questions, and feel free to set up an appointment to visit the ranch to look at the bulls.

Sincerely,
Mike and Debra Sitz
& Family
Joel and Bethany Johnston
& Jordee

This sale will be broadcast live on the internet.

Coleman Charlo 0256, a proven calving ease sire, has been called the cattleman's kind with his base width, muscle shape, length, and big foot size. He stamps each calf with eye appeal, thickness, and muscle expression. Charlo ranks in the top 1% of the Angus Breed for \$Wean.

Charlo's flush sisters and daughters in production have beautiful udders, are easy fleshing, wide based, and deep sided. With his balanced EPD's and positive \$EN, he produces daughters that are efficient and profitable. He will add capacity and fleshing ability to a set of replacement heifers, and stouten up a set of sons.

Cow Energy Value (\$EN), expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

MSAR Game Day 4042 has the right frame score to produce functional and efficient females, with muscle and thickness. While a prolific breeder, he easily maintains his weight on grass during the breeding season. His progeny are eye-appealing cattle with great dispositions. MSAR Game Day 4042 has 10 Pathfinders in his three-generation pedigree. There is a history of longevity evident in the generations of his outstanding cow family. Within MSAR Game Day 4042's pedigree you will find "Old 827", with her 17 calves on record, with high producing cows following her pattern of production. Home raised MSAR Forte 6776, a Pathfinder Sire, is his maternal grand sire. If you are looking to extend your grazing season – and your pocket book – with a moderate framed cow, this bull will produce the type of cattle you are seeking in a complete package.

MSAR Game Day 4042 is a perfect example of why we use our own bulls to make cows.

MSAR Emblazon 2092 is a son of MSAR Emblazon 4086. He is an impressive, free moving bull that travels well with great feet and legs. He is a thick, deep bodied, and moderate framed, producing progeny with calving ease and high weaning and yearling weights.

MSAR Emblazon 2092's pedigree contains a succession of highly productive cows with longevity, tracing back to respected sires such as DHD Traveler 6807; Right Time 24J; QAS Traveler 23-4; Schearbrook Shoshone; Papa Forte 1921; N Bar Emulation EXT and GDAR Rainmaker 340. MSAR Emblazon 2092 would rank in the "easy keeping" and "easy fleshing" category. While a prolific breeder, he maintains his weight on grass during the breeding season. MSAR Emblazon 2092 and MSAR Emblazon 2092 - 4079 are both owned by Clayton Gurney, Burwell, Nebraska. You can check out the bull's progeny photos on our website, beginning at 2014, by scrolling down to the very bottom of the Photo Gallery.

MSAR Chinook 9569 is a proven calving ease bull, and a son of CAR Chinnook 786. Chinook 9569 has strong performance on both his sire's and dam's side going back several generations. The maternal grandsire, Sitz Traveler 6802, is a noted female producer. The dam and grand dam of Chinook 9569 are consistently high producing cows, having eleven, and nine calves on record. The great-grand dam, 890, is an N Bar Emulation EXT daughter. She was a high producing, good uddered female as a fifteen year old, with a total of 14 calves on record. Her daughters are following this same pattern of consistent production.

MSAR Chinook 9569 has a slightly larger frame, is eye appealing, with a good disposition. We are pleased with our daughters in production, and cattlemen will appreciate Chinook 9569 rates in the top 10% for Heifer Pregnancy (HP). We continue to use this bull AI.

Calving Ease Direct (CED) is an EPD expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when the sire is bred to first calf heifers.

Calving Ease Maternal (CEM) is an EPD expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughter will calve as first-calf heifers when compared to daughter of other sires.

Heifer Pregnancy (HP) is a selection tool to increase the probability or chance of a sire's daughter's becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD value is more favorable.

First Breeding Season Coverage

All bulls selling for \$3000 or more will be covered 50% by Mike Sitz Angus and JJA if they are injured during their first breeding season. First breeding season is defined as the 60-day period following the first turnout of the bull on injuries that occur in the breeding pasture. 50% of the value of the injured bull, minus one-half salvage value, will be given as a credit in a future sale or toward a replacement bull if one is available. As a two-year-old bull, the minimum salvage value will be valued at \$1350. Salvage value will be split equally between Mike Sitz Angus/JJA, and the buyer. A veterinarian must diagnose all injured bulls. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2019. This is not mortality insurance. This does not cover poor management or neglect.

This sale will be broadcast live on the internet.
