Selling 100 Top Two-Year-Old Virgin Bulls

Monday, February 5, 2024 ~ 1:00 CST
Burwell Livestock Market, Burwell, NE

Cattlemen:

For 100 years maternal genetics have been at the heart of the Sitz Family breeding program. From these time-proven cow families, MSAR and JJA market exclusively Top Coming Two-Year-Old Virgin Bulls raised under range conditions. Here you will find a consistency obtained from generations of selective breeding.

The culling process begins at weaning, again as yearlings, with a final cut before the bull sale. Only the top of the calf crop is retained.

Our herd management would be considered low input, especially for a purebred operation. In a low-input environment, evaluation is more accurate in finding those easy fleshing and fertile animals. This means no creep feeding for the calves and only protein and hay for the cows in winter. Tough selection on our part translates to more profit in your cowherd.

Our returning customers are the backbone of our sale success. Ask any of our customers and they will talk of their appreciation of how the bulls are developed primarily on grass and roughage in order to build long-term soundness.

Look at the sale offering, compare, and see what our program is accomplishing. Thank you to all of our customers who have supported us through the years.

Please feel free to call if you have any questions or to set up a time to visit the ranch and view the bulls. Be sure to check out the DVAuction videos. We are excited about this year's sale offering. We look forward to seeing you Monday, February 5, 2024. Come for lunch!

Prioritizing Maternal Traits

A profitable cow herd begins with efficient females. MSAR and JJA have earned the MaternalPlus designation showing our operation is dedicated to data reporting, providing information to make effective selection decisions, and expanding reproductive and cow survivability tools.

Mike and Debra Sitz Family and Joel, Bethany and Jordee Johnston

Mike, Debra, and Jesse Sitz accept the American Angus Association's Century Award in recognition of 100 years of continuous production of registered Angus cattle.

Contact:

Mike Sitz: 308.348.2273 (H)

Joel Johnston:

308.348.2010 (H) or 308.645.7134 (C)

Sale Day/Sale Barn: 308.346.4257

Auctioneer:

Mike Baxter: 402.387.1861 (H) or 402.394.5686 (C)

Location: Burwell Livestock Market, Burwell, Nebraska. Located in the southwest part of town, southwest of the water tower, at 401 S. 11th.

Bulls will be trucked in the morning of the sale.

Delivery: We deliver in Nebraska, or 250 miles from Burwell, with total purchases of \$3000 or more. We will coordinate with all buyers on delivery. All bulls will be delivered by the first part of March.

First Breeding Season Coverage: See page 25 for details.

Herd Health: All bulls have tested negative for BVD. Bulls were vaccinated with IBR, BVD, PI3, BRSV, 7 Way Blackleg and are poured.

Semen Evaluation: All bulls have passed a fertility and breeding soundness exam evaluation by Dr. Terri Bridgman, Burwell, NE -308.750.9128.

All are virgin bulls with the exception of those we used for clean-up and those are Trich tested.

Retained Interest: Mike Sitz Angus (MSAR) or Joel Johnston (JJA) is retaining 1/3 semen interest on all bulls. Buyer has full possession.

Terms & Conditions: The cattle sell under the Terms and Conditions of the American Angus Association. All cattle are the buyer's property as soon as sold.

Absentee Bids: If you cannot be with us sale day, we will confidentially and honestly handle any bids for you. Call Mike Sitz, Joel Johnston or Mike Baxter. On Sale Day call the Livestock Market at 308.346.4257.

Storm Date: Is set for Monday, February 12th. In case of severe weather, call the Livestock Market at 308.346.4257 about the possibility of a sale postponement.

Bid Online! If you are unable to attend the sale, you can register to watch or bid online through DVAuction by following these instructions:

Online Bidding is available through DVAuction.com.

Please register on DVAuction at least 24 hours before the sale. A full-time support team can be reached at 402.316.5460 or contact representative Tami MacIntosh, 308.870.3661. Sale will be broadcast live on the Internet. High-speed internet is required. Real time bidding and proxy bidding available.

Preview Bull Videos www.mikesitzangus.com or dvauction.com

1. Create an account at www.dvauction.com under "create new account" tab.

2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, **at least 24 hours prior to the auction.**

3. Tune into the sale and make your purchases.

High speed Internet is required for successful bidding. Be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding: If you cannot make time to watch the sale, register a proxy bid and let our system represent your bid while you are away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at 402.316.5460.

Liability: Mike Sitz, Joel Johnston, or Burwell Livestock Market assumes no liability, legal or otherwise, for any accident that may occur on the sale premises.

Accommodations:

Rodeo Inn, Burwell, 308.346.4408

Sandhill Suites, Burwell, 308.346.4964

Pump and Pantry Motel, Burwell, 308.346.4607

KG Justified 3023 is a highly proven bull with balanced numbers that commercial cattlemen appreciate. He is a high-capacity, easy fleshing, calving ease sire with a solid pedigree that produces great maternal animals and a high profit potential for commercial cattlemen. He offers breed leading \$W and outcross opportunities. His females are highly productive, structurally sound, are easy-keeping with great udders. His sons have body mass, extra muscle shape and definition, with quality feet. In the Angus breed he is in the **top 5% for BW (Birth Weight)**, **top 10% for HP (Heifer Pregnancy)**, **top 25% for \$EN (Cow Energy Value)**, **Top 2% for \$M (Maternal Weaned Calf Value)**, **top 3% for \$W (Weaned Calf Value)**, **top 10% for Claw Set**, **top 10% for Marb (Marbling)** and **top 15% in \$G (Grid Value)**.

• Calving Ease. Ranks in the top 10% of the breed for \$EN. Top 1% for \$M.

Maternal Weaned Calf Value (\$M) is the most maternally-focused selection index currently available to users of Angus genetics. \$M, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M places greater emphasis on the cost side of commercial cow-calf production than any tool available. Increased selection pressure on \$M aims to **decrease overall mature cow size while maintaining weaning weights** consistent with today's production.

MSAR/JJA 2024 Sale Bulls

- 41% are in the top 3% ($\geq +88$ \$M).
- 71% are in the top 10% ($\geq +79$ \$M).
- 86% are in the top 20% ($\geq +73$ \$M).

Heifer Pregnancy (HP), is a selection tool to increase the probability of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Cow Energy Value (\$EN), expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires.

Mohnen Substantial 272 combines pedigree flexibility and **proven calving ease** with added **thickness, maternal strength, performance and efficiency**. He has **excellent feet and legs**, rating high for Claw and Angle for **breed leading foot quality**. His Birth EPD is -1.9, with a wide spread to his Yearling EPD of +107. We used him on our heifers because he had consistent numbers in addition to being one of the more efficient bulls who combines good numbers with foot score, carcass and performance.

MSAR Emblazon 2092 was used prior as cleanup when he was a yearling, and was purchased back as a seven-year-old, using him to pasture breed and to use AI. One of his most notable characteristics was the way he moved. He was an impressive, **free moving bull** that traveled well with great feet and legs.

He has **proven calving ease**, and is a **thick, deep bodied**, moderate bull, consistently producing progeny with high weaning and yearling weights. 2092 is extremely consistent with everything we desire in progeny. He makes good cows with great udders and fleshing ability, good weaning and yearling weights, and sons that have a lot of muscle shape and extra length of body--- and most importantly, we get these characteristics **consistently** year after year.

MSAR Emblazon 2092 would rank in the "easy keeping" and "easy fleshing" category. While a prolific breeder, he maintains his weight on grass during the breeding season. To top it off, his progeny follows his temperament of a **nice disposition**.

BULL MANAGEMENT

In mid-October, the bull calves are weaned, and go back on native range with salt and mineral. Their ration is distiller's cubes and winter range, to gain two-pounds per day. Later, the bulls are put on a high roughage ration of ground prairie hay, modified distiller grain, and a little corn, to gain two pounds a day. As yearlings, the bulls graze native range and bottoms of cool-season grasses, supplemented only with salt and mineral. In mid-October, pre-sale, they begin a high roughage ration consisting of prairie hay, modified distiller's grains, and a little corn.

OUR BULLS ARE MORE EASILY EVALUATED

When you attend our sale, our bulls are more easily evaluated because conformation faults are not hidden behind high camouflage fat. We all know when it comes to bull marketing – to put it simply – fat sells. **We avoid the negative effects of overfeeding in relation to the long-term health of the bull.**

MSAR Emblazon 2092 - 4079 (Century) was our high selling bull in 2016. Prior to the sale we had used 4079 as a yearling for clean-up, and after seeing his progeny we purchased him back as an eight- year-old for use in pasture breeding and AI. He is an easy keeping bull with great feet and legs. His dam has 11 calves on record with an average of 103 for Birth, 104 for Weaning and 105 for Yearling. His grandsire is MSAR Emblazon 4086 and the Blackbird line on the maternal side has Papa Forte 1921 and LT 598 Bando 9074.

WHY DON'T WE CREEP FEED?

Developing our calves without creep gives us a more accurate record of what the cow is actually producing. Is she raising a big, healthy calf on her own? Is she keeping adequate flesh doing so? Is she breeding back on time? These questions about the cow herd cannot be accurately answered with the utilization of creep feeding, or the use of other supplements.

What is the benefit of this practice to you? If your aim is to reduce production costs and also keep replacement heifers, you will benefit from our rigid culling practices. The more rigidly we cull and sort our own herd the more likely you are to reap the future rewards of a functional, economical cow herd of your own by using bulls from these productive cows. Added production coupled with fertility and longevity with less feed is more dollars in your pocket.

WHY DO WE USE OUR OWN BULLS?

We use our own genetics because we trust our program. We take our most outstanding genetics, and stack those as a way of locking in and enhancing desirable traits.

Using our own genetics has also helped us avoid genetic defects, breed true, and attain genetic purity.

MSAR Game Day 4042 is a **prolific breeder**, easily maintaining his weight on grass during the breeding season. 4042 has the right frame score to **produce functional and efficient females** with great udders, yet still produce calves with **good muscle expression and thickness**. Year after year, it has been easy to pick out his straight, uniform calves which have consistently grown up to be eye appealing, easy fleshing cattle with great dispositions.

MSAR Game Day 4042 has **10 Pathfinders** in his three-generation pedigree, and a history of **longevity** is evident in the high producing cows found on his maternal side, including "Old 827" with her 17 calves on record. His maternal grand sire, MSAR Forte 6776, is a Pathfinder Sire and another one of our home- raised bulls.

If you are looking to extend your grazing season -- and your pocket book -- with a moderate framed, stylish cow, this bull will produce the type of cattle you are seeking in a complete package. MSAR Game Day 4042 is a perfect example of why we use our own bulls to make cows.

DAY IN AND DAY OUT

The most important elements of functional and profitable cattle are hard to measure and complicated to explain. With all the countless numbers available it still does not replace the day in and day out hands on experience within our own cowherd. With this knowledge, coupled with over 50 years of Angus Herd Improvement Records (AHIR), we can help with the bull selection process. By drawing from the personal understanding of our herd, one can be confident that we are able to help find the bull best suited for your program.

HEIFER AND COW MANAGEMENT

After weaning, the heifer calves winter graze in the hills, have salt and mineral, and are supplemented with a distiller's cube to gain one pound per day. They will receive prairie hay when the winter grazing is short or covered with snow.

In June, heifers are synchronized, heat detected, and artificially inseminated. A calving ease bull is turned in for 30 days. After pregging, all open heifers are sold.

Once calves are weaned, the cows are wintered on range and meadow regrowth supplemented with distiller's cubes. Prairie hay is fed in January, once the native range is short.

At calving, cows are on pasture, and supplemented with cake and prairie hay. At birth each calf is caught and hand-weighed with a scale for their actual birth weight.

In June, the cows are synchronized, heat detected, and artificially inseminated. Cows and first calf heifers are sorted into bunches of sixty, and each bunch has a bull turned in with them for forty-five days. At the end of October, females are preg-checked and all opens are sold with no exceptions.

Throughout the year we constantly evaluate feet, udders, disposition, and performance.

FIRST BREEDING SEASON COVERAGE

Bulls are guaranteed to be sound and healthy breeders. All bulls selling for \$3000 or more will be covered 50% minus one-half salvage value by Mike Sitz Angus and Joel Johnston Angus if they are injured during their first breeding season. First breeding season is defined as the 60-day period following the first turnout of the bull on injuries that occur in the breeding pasture. 50% of the value of the injured bull, minus one-half salvage value, will be given as a credit in a future sale or toward a replacement bull if one is available. As a two-year-old bull, the minimum salvage value will be valued at \$2000. Salvage value will be split equally between Mike Sitz Angus or Joel Johnston Angus and the buyer. A veterinarian must diagnose all injured bulls. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2024. This is not mortality insurance. This does not cover poor management or neglect.

STANDING THE TEST OF TIME

For 100 Years Our Cow Herd Has Stood The Test of Time.

Marshall Queen, Blackbird, Evidences Eppionia, Erica Ellen, Proud Formera, Dora, and Emma E are cow families found in our herd today, all tracing back to Grandparents Will and Frieda Sitz's seven original cow families purchased in 1923. One hundred percent of our present-day cowherd are direct descendants from these original cow families.

Our cowherd is a family treasure and we regard it as such. By working within the boundaries of these bloodlines, we have a consistency that can only be achieved from generations of selective breeding. Efficient cow lines have emerged by staying on track, avoiding fads and being committed to raising fault free cattle.
