MIKE SITZ ANGUS RANCH JOEL JOHNSTON ANGUS

84711 460th Ave, Burwell, NE 68823

Bub and Pam Chaffin **Repeat Customers since 1988**

Some may remember the Chaffin Hereford Field Day, a yearly event held in the 1960's and early 70's at the Chaffin Hereford Ranch north of Burwell for FFA and 4-H members of the area. RB Warren from the University of Nebraska-Lincoln was the official judge of the five classes of animals—four classes of Hereford cattle and one class of horses. Leland and Marie Chaffin along with their son, Bub, held this event to help promote their Hereford bulls.

One would ask; With this strong Hereford heritage how did Angus bulls arrive on the scene at the Chaffin Ranch?

Bub said calving ease in the Hereford heifers was proving to be a problem, which prompted the Chaffin's to use longhorn bulls on their first calf heifers. This did solve their calving problems but marketing the calves became a concern. Bub decided to try Angus bulls, and when the first Angus bull stepped onto the ranch, Bub's dad, Leland exclaimed, "What the heck is that!?" However, Leland was soon won over by the benefits the Angus breed provided.

Bub and Pam Chaffin first bought Angus bulls from Mike Sitz in 1988. Initial purchases were CSU Rito 4114 sons; bulls with high maternal. The next 36 years saw Bub and Pam continuing to pick out a certain type of maternal bull building their cowherd.

When asked why they liked the Mike Sitz bulls, Bub said, "The bulls make really good cows, and the steer calves always sold really well. The calving ease on heifers is excellent." Bub added, "And when you top the market nationwide, why would you change?"

Bub is referring to the Steer Tracker Market Report that is posted throughout the country, where two years ago the Chaffin steers selling at the Burwell Livestock Market, were the top selling steers in the nation. Bub said, "I didn't get any sleep the night before the sale worrying about how the calves would sell, and then I didn't get any sleep the night after the sale because I was too excited about the steers being top in the nation!"

Pam, the care taker of the bulls, said her favorite set of bulls are their MSAR Emblazon 2092 and MSAR Emblazon 2092 -4079 (Century) sons. She appreciates their temperament and says the daughters are so fertile.

Bub and Pam, and daughter Jamie, along with part time help from their son, John, and grandchildren, are the work force of the ranch—and don't forget cow dog, Buckie.

Selling 95 Top Two-Year-Old Virgin Bulls

Monday, February 3, 2025 - 1:00 CST

Burwell Livestock Market, Burwell, NE

Welcome! We appreciate the interest you have in our Bull Sale. Take a look at the sale offering, compare, and see what our program has to offer.

Please feel free to call if you have any questions, or to set up a time to visit the ranch to view the bulls.

Be sure to check out the DVAuction videos.

We look forward to seeing you Monday, February 3, 2025 at Burwell. *Come for lunch!*

The Sitz and Johnston Families

Mike & Debra Sitz

Bethany, Joel and Jordee Johnston

Bub and Pam Chaffin with Buckie

Contact:

Mike Sitz/Home: 308.348.2273

Joel Johnston/Cell: 308.645.7134

Joel Johnston/Home: 308.348.2010

Sale Day/Sale Barn: 308.346.4257

Auctioneer:

Mike Baxter/Home: 402.387.1861

Mike Baxter/Cell: 402.394.5686

Location: Burwell Livestock Market, Burwell, Nebraska. Located in the southwest part of town, southwest of the water tower, at 401 S. 11th.

Bulls will be trucked in the morning of the sale.

Delivery: We deliver in Nebraska, or 300 miles from Burwell, with total purchases of \$3500 or more. Call prior to the sale for other delivery options. If you bring your own trailer, we will deduct \$50 per bull on sale day. All bulls will be delivered by the first part of March.

First Breeding Season Coverage: See page 25 for details.

Herd Health: All bulls have tested negative for BVD. Bulls were vaccinated with IBR, BVD, PI3, BRSV, 7 Way Blackleg and are poured.

Semen Evaluation: All bulls have passed a fertility and breeding soundness exam evaluation by Dr. Terri Bridgman, Burwell, NE - 308.750.9128.

All are virgin bulls with the exception of those we used for clean-up and those are Trich tested.

Retained Interest: Mike Sitz Angus (MSAR) or Joel Johnston (JJA) is retaining 1/3 semen interest on all bulls. Buyer has full possession.

Terms & Conditions: The cattle sell under the Terms and Conditions of the American Angus Association. All cattle are the buyer's property as soon as sold.

Absentee Bids: If you cannot be with us sale day, we will confidentially and honestly handle any bids for you. Call Mike Sitz, Joel Johnston or Mike Baxter. On Sale Day call the Livestock Market at **308.346.4257**.

Storm Date: Is set for Monday, February 10th. In case of severe weather, call the Livestock Market at 308.346.4257 about the possibility of a sale postponement.

Pathfinder status is designated by a #

Bid Online! If you are unable to attend the sale, you can register to watch or bid online through DVAuction by following these instructions:

Online Bidding is available through www.DVAuction.com.

DVAuction
Broadcasting Real-Time Auctions

Please register on DVAuction at least 24 hours before the sale. A full-time support team can be reached at 402.316.5460 or contact representative Tami McIntosh, 308.870.3661. Sale will be broadcast live on the Internet. High-speed internet is required. Real time bidding and proxy bidding available.

Preview Bull Videos www.mikesitzangus.com
or www.dvauction.com

1. Create an account at www.dvauction.com under "create new account" tab.
2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, **at least 24 hours prior to the auction.**
3. Tune into the sale and make your purchases.

High speed Internet is required for successful bidding. Be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding: If you cannot make time to watch the sale, register a proxy bid and let our system represent your bid while you are away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at 402.316.5460.

Liability: Mike Sitz, Joel Johnston, or Burwell Livestock Market assumes no liability, legal or otherwise, for any accident that may occur on the sale premises.

Accommodations:

Rodeo Inn, Burwell, 308.346.4408

Sandhill Suites, Burwell, 308.346.4964

Pump and Pantry Motel, Burwell, 308.346.4607

KG Justified 3023 is a highly proven bull with balanced numbers that commercial cattlemen appreciate. He is a high-capacity, easy fleshing, calving ease sire with a solid pedigree that produces great maternal animals and a high profit potential for commercial cattlemen. He offers breed leading \$W and outcross opportunities. His females are highly productive, structurally sound, are easy-keeping with great udders. His sons have body mass, extra muscle shape and definition, with quality feet. In the Angus breed he is in the **top 5% for BW (Birth Weight)**, **top 5% for HP (Heifer Pregnancy)**, **top 20% for \$EN (Cow Energy Value)**, **Top 2% for \$M (Maternal Weaned Calf Value)**, **top 4% for \$W (Weaned Calf Value)**, **top 10% for Claw Set**, **top 10% for Marb (Marbling)** and **top 20% in \$G (Grid Value)**.

2025 Sale Bull Average - Top 15% for \$M and Top 15% for \$EN in the Angus Breed

Maternal Weaned Calf Value (\$M) is the most maternally-focused selection index currently available to users of Angus genetics. \$M, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M places greater emphasis on the cost side of commercial cow-calf production than any tool available. Increased selection pressure on \$M aims to **decrease overall mature cow size while maintaining weaning weights, with an increase emphasis on heifer pregnancy and docility.**

Cow Energy Value (\$EN), expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Heifer Pregnancy (HP), is a selection tool to increase the probability of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season.

LT Converse 8011 is highly proven in all traits. He has proven calving ease, and is a moderate framed, high-capacity bull with abundant muscling. Converse is a structurally sound, good footed bull with excellent foot scores. Converse's progeny are stylish and eye appealing. Converse will improve udder attachment and teat size. He has excellent fleshing ability, rib shape and marbling. His dam is from a top cow line in a trusted program and his daughters are admired by cattle breeders worldwide. In the Angus breed he is in the **top 4% for BW (Birth Weight)**, **top 10% for \$EN (Cow Energy Value)**, **Top 10% for \$M (Maternal Weaned Calf Value)**, **top 15% for \$W (Weaned Calf Value)**, **top 4% for Claw Set**, **top 2% for Angle**, **top 20% for Marb (Marbling)** and **top 30% in \$G (Grid Value)**.

S A V Rainfall 6846 is a calving ease sire from Schaff's Angus Valley. He combines highly proven CED and BW EPD's with maternal strength and performance. Rainfall adds length and soundness with eye appealing daughters that carry a full maternal package. He carries flawless muscle, hip, and rear-leg structure, with Claw set and Angle both in the top 10%. Rainfall is a \$W (Weaned Calf Value) leader that offers strong MARB and REA predictions in a high capacity, easy fleshing, good footed design.

Square B Atlantis 8060's dam is best known for producing the very popular Connealy Confidence Plus. Atlantis is a highly proven maternal sire with top level docility and foot quality. He offers balance, early accelerated growth with moderate mature size to those looking to improve type, kind, muscle expression and structural soundness.

In the Angus breed he is in the top 30% for HP (Heifer Pregnancy), Top 15% for Claw set, top 10% for RE (Rib Eye), top 25% for \$M (Maternal Weaned Calf Value), top 25% for \$W (Wean), top 15% for DMI (Dry Matter Intake) and top 25% for SC (Scrotal).

OUR BULLS ARE MORE EASILY EVALUATED

By carrying less fat our bulls are more easily evaluated. We all know when it comes to bull marketing – to put it simply – fat sells. We also know fat can be a mirage that melts as soon as the bull meets the pasture. **We avoid the effects of overfeeding in relation to the long-term health of the bull.**

MSAR Emblazon 2092 - 4079 as a 8 year old.

MSAR Emblazon 2092 - 4079 (Century) was our high selling bull in 2016. Prior to the sale we had used 4079 as a yearling for clean-up, and appreciating his subsequent progeny we had the opportunity to purchase him back as an eight-year-old for use in pasture breeding and AI. He is an easy keeping bull with great feet and legs. Customers appreciate the good disposition of his progeny. His dam has 11 calves on record with an average of 103 for Birth, 104 for Weaning and 105 for Yearling. **His daughters are very fertile with 100% of his daughters bred in 2024. 4079 (Century) is in the top 10% for HP (Heifer Pregnancy).**

**WHY DON'T WE CREEP FEED?**

Developing our calves without creep gives us a more accurate record of what the cow is actually producing. Is she raising a big, healthy calf on her own? Is she keeping adequate flesh doing so? Is she breeding back on time? These questions about the cow herd cannot be accurately answered with the utilization of creep feeding, or the use of other supplements.

What is the benefit of this practice to you? If your aim is to reduce production costs and also keep replacement heifers, you will benefit from our rigid culling practices. The more rigidly we cull and sort our own herd the more likely you are to reap the future rewards of a functional, economical cow herd of your own by using bulls from these productive cows. Added production coupled with fertility and longevity with less feed is more dollars in your pocket.

DAY IN AND DAY OUT

The most important elements of functional and profitable cattle are hard to measure and complicated to explain. All the countless numbers available still do not replace the day in and day out hands on experience within our own cowherd. With this knowledge, coupled with over 50 years of Angus Herd Improvement Records (AHIR), we can help with the bull selection process. By drawing from the personal understanding of our herd, one can be confident that we are able to help find the bull best suited for your program.

HEIFER AND COW MANAGEMENT

After weaning, the heifer calves winter graze in the hills, have salt and mineral, and are supplemented with a distiller's cube to gain one pound per day. They will receive prairie hay when the winter grazing is short or covered with snow.

In June, heifers are synchronized, heat detected, and artificially inseminated. A calving ease bull is turned in for 30 days. After pregging, all open heifers are sold.

Once calves are weaned, the cows are wintered on range and meadow regrowth supplemented with distiller's cubes. Prairie hay is fed in January, once the native range is short.

At calving, cows are on pasture, and supplemented with cake and prairie hay. At birth each calf is caught and hand-weighted with a scale for their actual birth weight.

In June, the cows are synchronized, heat detected, and artificially inseminated. Cows and first calf heifers are sorted into bunches of sixty, and each bunch has a bull turned in with them for forty-five days. At the end of October, females are preg-checked and all opens are sold with no exceptions.

Throughout the year we constantly evaluate feet, udders, disposition, and performance.

STANDING THE TEST OF TIME

For Over 100 Years Our Cow Herd Has Stood The Test of Time.

Marshall Queen, Blackbird, Evidences Eppionia, Erica Ellen, Proud Formera, Dora, and Emma E are cow families found in our herd today, all tracing back to Grandparents Will and Frieda Sitz's seven original cow families purchased in 1923. One hundred percent of our present-day cowherd are direct descendants from these original cow families.

Our cowherd is a family treasure and we regard it as such. By working within the boundaries of these bloodlines, we have a consistency that can only be achieved from generations of selective breeding. Efficient cow lines have emerged by staying on track, avoiding fads and being committed to raising fault free cattle.

FIRST BREEDING SEASON COVERAGE

Bulls are guaranteed to be sound and healthy breeders. All bulls selling for \$3500 or more will be covered 50% minus one-half salvage value by Mike Sitz Angus and Joel Johnston Angus if they are injured during their first breeding season. First breeding season is defined as the 60-day period following the first turnout of the bull on injuries that occur in the breeding pasture. 50% of the value of the injured bull, minus one-half salvage value, will be given as a credit in a future sale or toward a replacement bull if one is available. As a two-year-old bull, the minimum salvage value will be valued at \$2000. Salvage value will be split equally between Mike Sitz Angus or Joel Johnston Angus and the buyer. A veterinarian must diagnose all injured bulls. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2025. This is not mortality insurance. This does not cover poor management or neglect.

WHY DO WE USE OUR OWN BULLS?

We use our own genetics because we trust our program. We take our most outstanding genetics, and stack those as a way of locking in and enhancing desirable traits.

Using our own genetics has also helped us avoid genetic defects, breed true, and attain genetic purity.

BULL MANAGEMENT

In mid-October, the bull calves are weaned, and go back on native range with salt and mineral. Their ration is distiller's cubes and winter range, to gain two-pounds per day. Later, the bulls are put on a high roughage ration of ground prairie hay, modified distiller grain, and a little corn, to gain two pounds a day. As yearlings, the bulls graze native range and bottoms of cool-season grasses, supplemented only with salt and mineral. In mid-October, pre-sale, they begin a high roughage ration consisting of prairie hay, modified distiller's grains, and a little corn.
