Top Coming Two Year Old Angus Bulls

From A Time
Proven Cow Herd.

Dear Cattlemen:

Take this opportunity to own a Two-Year-Old Angus bull from an established and reputable herd. With over 80 years of breeding continuous cow families, combined with three generations of Angus knowledge, you can buy with confidence.

The cowherd is time proven with bloodlines tracing back to the original cow families first owned by grandfather, Will Sitz, in 1923. Efficient cow lines have emerged by staying on track, avoiding fads and being committed to raising fault free cattle.

When you purchase a bull from us, you are purchasing a program with profitable traits that you cannot find sifting through the numbers.

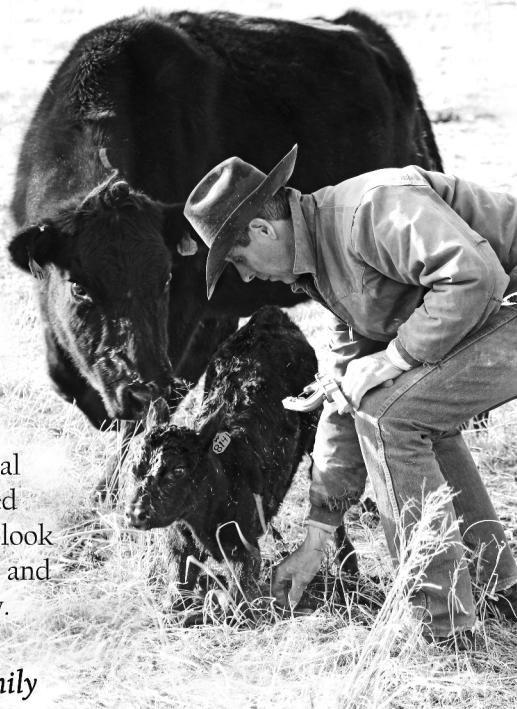

There are no epds to measure the most important economic traits such as fertility, mothering ability, disease resistance and calf survivability. This bottom line of profitability is something we take seriously.

Selling from these hard working cows is the very top of our 2012 bull crop.

All are virgin bulls with the exception of four bulls we used within our own herd. The bulls were summered on grass with no supplemental feed until the end of October. At the present time they are being fed a high roughage ration in a large pasture with plenty of room to run.

We are grateful for our loyal customers and their continued support of our program. We look forward to seeing old friends, and meeting new ones on sale day.

Sincerely, The Mike Sitz Family

MSAR Emblazon 4086 is a proven calving ease sire while his progeny exhibit excellent growth at weaning. MSAR Emblazon 4086 was purchased at our 2006 Bull Sale by Cedar Top Ranch, Stapleton. Later we began using 4086 extensively through AI on our heifers because of his outstanding dam and grand dam. His progeny are attractive cattle with thickness. They are easy fleshing, sound and structurally correct, with his sons being tight sheathed. Emblazon 4086's daughters have a more moderate frame size with excellent udders.

MSAR Emblazon 4086's dam has production records of 13 calves at 98 for Birth, 13 calves at 98 for Wean and 12 calves at 99 for Yearling. The grand dam to this bull, Old 827, has produced 17 calves with Birth ratios of 100, Wean Ratios of 101 and Yearling Ratios of 101.

We think enough of this bull that we used his sons exclusively as cleanup this last breeding season. MSAR Emblazon 4086's first sire group was well received in our 2013 sale, averaging \$5417.

MSAR Chinook 9569 is a calving ease bull, and a son of CAR Chinook 786. We chose to use MSAR Chinook 9569 in our herd because of his sire's flawless pedigree and strong performance on his dam's side going back several generations. Both his sire and dam have generations of documented maternal strength.

The maternal grand sire, Sitz Traveler 6802, is a noted female producer. The dam and grand dam of Chinook 9569 are consistently high producing cows, having seven, and nine calves on record. The great-grand dam, 890, is a N Bar Emulation EXT daughter. She was a high producing, good uddered female as a fifteen year old, with a total of 14 calves on record. Her daughters are following the same pattern of consistent production.

MSAR Chinook is very stylish and slightly larger framed than our Forte and Right Time sires. Chinook, like his sire, CAR Chinook 786, breeds into his progeny an excellent disposition with eye appeal from start to finish. We have been pleased with the daughters in production.

—MSAR Right Time 7757 —

MSAR Forte 6776 is structurally correct and stylish, working well on all types of cattle. His sire group continues to be very consistent, balancing out all cow types. 6776's bloodline traces back to PAPA Forte 1921, one of the great carcass bulls of the breed. His dam, 1029, is a Pathfinder cow having a BR of 9/95, WR of 9/106 and YR of 9/106. She is considered one of the best cows raised on this ranch. 6776 is not a single trait bull, but doing it all well, and being a cow maker may well be his best trait. His daughters are proving this by producing some of our best looking calves. Forte 6776's calves are extra vigorous at birth and the bull also has a good disposition. Early in the 2009 breeding season he was injured and we were forced to put him down. We continue to use him as an AI sire.

MSAR Right Time 7757's sire, 24J is known as the Cow Maker. 7757's daughters are following this pattern, moderate framed, sharp and feminine, with excellent udders.

Right Time 7757 is from the Msar Proud Formera 1029 cow and a half brother to our MSAR Forte 6776 bull. His three generation pedigree is packed with ten Pathfinders and his dam, a Pathfinder cow herself, has production records of 9/95 for Birth, 9/106 for Weaning, and a Yearling of 9/106. Right Time 7757 daughters are now in production and proving to be good producers.

Calving Ease Direct (CED) is an EPD expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when the sire is bred to first calf heifers.

Calving Ease Maternal (CEM) is an EPD expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

First Season Breeding Coverage

All bulls selling for \$2500 or more will be covered 50% by Mike Sitz Angus if they are injured during their first breeding season. First breeding season is defined as the 60 day period following the first turnout of the bull on injuries that occur in the breeding pasture. 50% of the value of the injured bull, minus one-half salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. As a two-year-old bulls, the minimum salvage value will be valued at \$1250. Salvage value will be split equally between Mike Sitz Angus and the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2014. This is not mortality insurance. This does not cover poor management or neglect.
